

Cluster Progress

September 23, 2019

NAS-1 Progress

- NAS-1 no longer boots into emergency mode
- The hard drive in slot 0:21 is currently rebuilding, all others are online.

```
08:20      24 Onln    0 1.818 TB
08:21      25 Rbld    0 1.818 TB
08:22      26 Onln    0 1.818 TB
```

```

-----
```

NAS-0 ZFS

- Somehow, zfs was uninstalled from NAS-0, as well as twcli.
- twcli has been reinstalled successfully, but zfs is having issues reinstalling.
- Once they are reinstalled, hopefully the zpool can be discovered and reimported.

APC Batteries

- The voltages on the APC batteries have dropped from 12.5V to 9V (and some almost to 0)
- New batteries have been ordered and should be delivered soon.
