# NAS-1 Emergency Mode

- NAS-1 booted into emergency mode after being turned off for the Hurricane.
- An error message appeared, saying that there was an, “Un-Correctable DRAM ECC Error at CPU02/DIMM2A”
- Michael and I swapped the RAM in slots 2A and 3A to make sure the issue was with the RAM instead of with the slot.
- However, upon rebooting the error message did not appear, and NAS-1 booted into emergency mode again.

Un-Correctable DRAM ECC Error Detected at CPU02/DIMM2A  
Press F1 to Resume
